

APPLIED SOLUTIONS

In order to satisfy the rigorous and highly specialized demands of our customers across verticals, Applied Energy Systems offers Applied Solutions – **innovative, custom solutions for application-specific needs.**

Your process requirements are like no other, and your gas handling system should be too. Our Applied Solutions bring together our robust product offerings, industry-leading services and vertical expertise to solve even the most complex gas delivery and distribution challenges—benefitting customers of all sectors and sizes who have highly specific application requirements.

Through our Applied Solutions, you can enjoy our renowned products and technical expertise while **tapping into the innovation necessary to solve your specific challenges.**

Adapting Our Proven Equipment to Your Distinct Needs

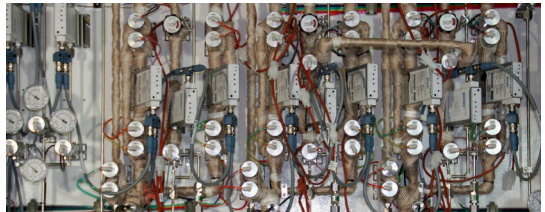

By synergizing our specialized engineering capabilities with our proven lines of SEMI-GAS® and VERSA-GAST™ products, we are able to **tailor our core solutions to create an adapted, custom system that meets your needs.**

Bringing Expertise Informed by Industry Best Practices

In partnering with customers across a diverse range of industries, we've seen numerous types of gas delivery challenges. **We apply that experience to your unique situation for optimal results.**

Taking a One-Size-Fits-One Approach

When innovation is critical to your business, your manufacturing process must be differentiated. **We assess and understand your application first,** then build our solution around its unique requirements.
